FOR IMMEDIATE RELEASE

SolAmerica Announces Completion of Its First Maryland Solar Project

September 30, 2015 – Atlanta, GA – SolAmerica Energy, LLC (“SolAmerica”) of Atlanta today announced completion of Phase Two construction of the Nixon Farms solar project in West Friendship, MD. This is SolAmerica’s first project in Maryland and part of its on-going strategy to design, develop and construct solar projects along the East Coast. For this project, SolAmerica provided design and construction services for the 2 MW ground-mounted solar array under an Engineering, Procurement & Construction (“EPC”) agreement with SunEdison (NYSE: SUNE).

The project is part of a 10 MW solar development at Nixon Farms, a 67-acre site in Howard County, MD. Phase One of the project was energized in November 2014. The project’s off-taker, the city of Columbia, Md. will be offsetting 25 percent of its energy usage with this solar array.

SolAmerica and SunEdison previously partnered on the development and construction of two solar projects in Georgia under the Georgia Power Advanced Solar Initiative. “It has been great to team with SunEdison again on a project of this importance” said R. Stanley Allen, president of SolAmerica. “Nixon Farms represents our coming out party in the Mid-Atlantic, and we hope to work with SunEdison on future projects in the area and other regions of the country as well.”

About SolAmerica Energy

Founded in 2009, SolAmerica Energy, LLC is a leading Developer, EPC, and Operations & Maintenance Provider of solar photovoltaic (PV) projects for commercial, industrial, and government clients. SolAmerica’s core competencies include site assessment, solar finance, system design and engineering, procurement, turnkey installation, testing, system monitoring, and operations and maintenance. With offices in Atlanta, Georgia, Charlotte, NC and

Washington DC, SolAmerica has extensive experience delivering high-profile solar projects. For additional information about SolAmerica, visit www.solamericaenergy.com.
